

Texas, USA Royalties

1.00% Overriding Royalty Interests over 7 wells in Burleson and Lee Counties, East Texas.

Operated by Atlas Operating LLC

In November 2016, High Peak acquired royalties over seven producing wells in Lee and Burleson County Texas. The seven producing wells are long reach horizontal well bores, five of which are in the prolific Eagleford Formation and the other two wells are producing from the Austin Chalk and Buda formations. All these wells have additional behind pipe potential for future production.

The area has over 10,000 acres completely covered with modern 3-D seismic that has the potential for hundreds of additional wells and royalty opportunities.
